Examiner's statement of reasons for allowance

The following is an examiner's statement of reasons for allowance:

1. Claims 8,11,28, and 30 are allowed because Prior art fails to show a lithography apparatus configured to form a pattern onto a semiconductor device, comprising: a guide beam: a translational structure having a work piece holder, the translational structure surrounding the guide beam such that the weight of the translational structure is supported by the guide beam, wherein the guide beam permits the translational structure to freely move substantially in only one degree of freedom along the guide beam; wherein, the guide beam includes a first and second vacuum chamber, the first vacuum chamber being a high vacuum chamber and the second vacuum chamber being a lower vacuum chamber; and the translational structure includes a first airbearing structure and a reticle plate, the first airbearing structure being arranged to be in fluid communication with the first vacuum chamber and the second vacuum chamber.

2. Claims 9,10, 12-24, and 28-32 are allowed by virtue of their dependency upon allowed claims 8,11,28, and 30.

3. The examiner agrees with Applicant's arguments presented in the amendment filed 4-21-2005, particularly applicant's addition of the limitation for the use of two vacuum chambers operating at different levels of vacuum, which overcomes the prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
